Record LightScribe or normal CD-Rs, DVD+Rs, or DVD-Rs one at a time or by the thousands with the CopyWriter LightScribe Tower Duplicators. Burn CDs at 48X and DVDs at 22X. When the job completes, turn the Lightscribe discs over and print ten labels all at once with LightScribe's laser-etching technology by HP. Never worry about ink or ribbon costs again

Handisc offer a range of support levels to ensure peace of mind. Blu-Ray Towers come with 1 years Back to Base warranty but this can be extended if needed. DVD Towers have a 2 year warranty as standard. We can also support or repair a system that wasn't supplied by Handisc
