The Epson Discproducer PP-100AP is as easy to use as an office printer. The Epson PP-100AP can print onto 100 CDs/DVDs in a single session. It processes up to 95 discs per hour and is therefore ideally suited for quick and efficient large batch production of professionally designed digital media. It's the only product in its class that has front facing control and status reporting.

Simple, straight forward, no-nonsense - As easy to use as an office printer, the Epson Discproducer PP-100AP can print onto 100 CDs/DVDs in a single session. It processes up to 95 discs per hour and is therefore ideally suited for quick and efficient large batch production of professionally designed digital media. It's the only product in its class that has front facing control and status reporting

The best print quality in its class - You'll get vibrant, lifelike, razor sharp prints from the Epson PP-100AP that are smudge proof and water resistant thanks to the advanced print technology and ink. Cost effective to own and maintain

Cost effective to own and maintain - Incredibly, you can produce over 1,000 prints per set of 6 ink cartridges using the Epson PP-100AP . And because it uses a separate cartridge for each colour, you only need to change the cartridges that are near empty

Support - Handisc offer a range of support levels to ensure peace of mind. The Epson Discproducer PP-100 comes with 1 years on-site warranty but this can be upgraded to a 3 year onsite agreement when the system is bought.
