Connectivity		USB 2.0 required

Call: 01264 335118 or Email: info@handisc.co.uk

The Microboards Print Factory Pro (PF-PRO) is designed to print hundreds of discs on a weekly basis. Its 100-disc throughput capacity allows for unattended operation and makes it one of the best automated disc printers on the market.

By utilizing the latest in HP inkjet technology, the print speed and quality of the MX Series of Disc Publishers and Printers is unequaled among disc duplicators. Separate C, M, Y, and Black ink cartridges means zero waste and the lowest possible cost-per-disc. One set of ink cartridges can produce 850 to 1,500 discs. Disc designs utilizing light text-only coverage could have a cost-per-disc as low as 2 pence, and throughput at upwards of 250 discs per hour.

The included software suite for all three products includes simple label design software. Design your label from a point-and-click application, or use popular design programs such as Photoshop® and import directly to the software. Publishers with recording ability include recording & job creation software for both Mac and PC, including support Windows 2000, XP, and Vista. Record or copy virtually any CD recordable or DVD +/- Recordable format, including Dual Layer DVDs!

Handisc offer a range of support levels to ensure peace of mind. The Microboards Print Factory Pro comes with 1 years back to base warranty but this can be extended if needed.
